

Arjun Arun

Product Lead · Payments, Pricing and Travel Tech

arjun.arun.mba25@said.oxford.edu · linkedin.com/in/arjun1199 · github.com/arjun-hq · arjun-hq.github.io

Product leader who has owned decisions on systems serving 300+ airlines and shipped payment apps across 100+ countries, pairing deep technical fluency with measurable commercial impact. Engineer by background, now building AI-native products through an Oxford MBA.

EXPERIENCE

Product Lead

Oct 2024 – Aug 2025

Amadeus, Bangalore, India · World's largest travel distributor, 40% of all global GDS airline bookings

- Owned the ticket reissue capability of Amadeus Ticket Changer, the change and refund platform used by 300+ airlines and built on a pricing engine handling 2.8B+ queries a day.
- Drove design and delivery of automation covering 60% of Air Canada's roughly 700K annual disruption-driven ticket changes, saving close to 50,000 agent hours.
- Led delivery of a configurable change-fee feature for Saudia, applied only when set conditions were met, generating roughly \$4M in projected annual revenue across 300K+ booking-change transactions.
- Partnered with airline customers to resolve 40+ high-priority production incidents, distilling them into 7 root-cause fixes that stopped the issues recurring.

Senior Software Engineer · Software Engineer

Jul 2021 – Oct 2024

Verifone, Bangalore, India · World's largest payment terminal network, \$8T+ annual transactions

- Shipped 5 payment applications including a patent-pending self-checkout device, driving \$18.2M revenue and 40% year-on-year growth through a subscription-led model while leading a 6-member team.
- Delivered a unified payment platform from first customer requirements to launch, consolidating region-specific products into one system for 100+ countries with differing hosts, protocols and compliance.
- Ran 30+ product demos and training sessions for customers, executives and internal teams, and mentored 16 new hires through onboarding that cut ramp-up time by 50%.
- Promoted to senior in 1.3 years against a 4 to 5 year average, the fastest in Verifone India's 26-year history.
- Identified 14 critical host-side vulnerabilities and implemented 7 fraud controls, cutting fraud losses by 64% and saving \$1M annually, and shipped next-generation fleet payment capabilities into LATAM and other emerging markets.

SELECTED PROJECTS

TrialLens LLM-powered clinical trial recruitment platform founded at Oxford. Patient-facing conversational AI, plain-language document simplification and guided e-consent, validated with Oxford clinicians.

UK Retail Investing App Crowdfunding app opening early-stage startup investing to retail investors, with in-app due diligence and AI-native company analytics.

Udaan AI business coach for women entrepreneurs in India. Voice or text in her own language, generating pricing, WhatsApp outreach, matched government schemes and income projections. Built at the Oxford AI for Good Hackathon.

Oxford Dinner Exchange Portal for matching students across colleges for formal dinners. Integrated by Oxford University into the official myOxford app.

CreatorOps iOS app giving independent creators commercial infrastructure: deal tracking, scripting, negotiation, invoicing and a live pipeline dashboard.

EDUCATION

University of Oxford, Saïd Business School

Master of Business Administration
Sep 2025 – Sep 2026

National Institute of Technology Calicut

B.Tech, Electronics and Communication Engineering
2017 – 2021
